

SAI KRISHNA NEBARTHI

Cloud & DevOps Engineer

Visakhapatnam, Andhra Pradesh, India | +91 7658929680 | sainebarthi036@gmail.com

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with hands-on internship experience provisioning AWS infrastructure (EC2, S3, RDS, CloudWatch), supporting CI/CD pipelines, and automating operational tasks with Python. Skilled in Git-based version control, Linux administration, and SQL-driven backend development. Proven ability to reduce deployment setup time, build reliable monitoring solutions, and document infrastructure and runbooks for production readiness. Seeking to contribute cloud automation and infrastructure skills to a growing engineering team.

TECHNICAL SKILLS

- Cloud Platforms: AWS (EC2, S3, RDS, CloudWatch, IAM basics)
- DevOps & CI/CD: Build/Test/Deploy pipeline stages, Git, GitHub (branching, PRs, merge workflows)
- Scripting & Automation: Python (task automation, data processing scripts)
- Operating Systems: Linux (command-line administration, shell basics)
- Databases: SQL, AWS RDS, MongoDB
- Core Concepts: Object-Oriented Programming (OOP), REST APIs, STLC/SDLC principles
- Other Tools: Documentation & Runbook Authoring, Monitoring & Alerting, Reporting

INTERNSHIP & WORK EXPERIENCE

Cloud & DevOps Intern — APSSDC (Andhra Pradesh Government)

May 2025 – Aug 2025

Visakhapatnam, AP

- Provisioned AWS infrastructure (EC2, S3) for application deployment workflows, reducing environment setup time by 40%
- Assisted in CI/CD pipeline stages (build, test, deploy) for non-production environments
- Automated recurring operational tasks using Python scripts, reducing manual effort
- Implemented monitoring and alerting using AWS CloudWatch (logs, metrics, alarms)
- Managed Git workflows including branching strategy, commits, and pull requests in collaborative team settings
- Authored deployment process documentation and operational runbooks to support knowledge transfer

PROJECTS

AWS Cloud-Based User Data Storage with RDS

- Designed and implemented a backend system for data storage and retrieval using AWS RDS, improving data handling efficiency
- Integrated REST APIs to enable seamless communication between frontend and database layers
- Used Git & GitHub for version control and collaborative development workflows
- Performed testing and debugging aligned with STLC principles to ensure system reliability

Crowdfunding Platform with Blockchain

- Developed an end-to-end platform integrating data processing and predictive analytics, achieving 98.5% accuracy across 135 test cases
- Built data preprocessing pipelines using Python and SQL for structured analysis
- Collaborated in a team environment, contributing to feature development and technical documentation
- Applied analytical thinking and problem-solving to optimize model performance

EDUCATION

B.Tech, Computer Science Engineering (Data Science)**Aug 2023 – Apr 2026***Raghu Institute of Technology, Visakhapatnam, AP | CGPA: 8.12/10***Diploma, Mechanical Engineering****Aug 2018 – May 2021***Government Polytechnic College, Visakhapatnam, AP | 61%***CERTIFICATIONS**

- Python for Data Science, AI & Development — IBM (Coursera)

ADDITIONAL STRENGTHS

- Problem Solving • Clean Code Practices • Continuous Learning of New Technologies
- Hobbies: Cloud Experimentation, Coding, Technical Research, Traveling
